

ATARI

DRAGON'S LAIR

An evil wizard has captured the king's daughter and imprisoned her in the caverns below his castle. The king's champion, Dirk the Daring, must fight his way past the wizard's traps and monsters and finally slay the dragon to rescue the princess.

THE LASER'S EDGE

*DIAGNOSTICS

The Starcom system contains a complete diagnostic package which is enabled by an internal switch. This self-testing feature checks these aspects of your machine:

*General Malfunctions: Any malfunctioning in the machine is located and indicated to you by a written message on the screen.

*ROM and RAM: If your ROM or RAM are faulty, the screen produces a written message indicating which part or parts are malfunctioning.

*Sound: The diagnostic package allows you to hear the sound chip to insure that it is working.

*Keyboard Input: The Starcom keyboard, including the coin switch, is completely testable.

*LASER DISC: The Laser Disc is read and tested to make sure it is in perfect working order.

*CONVERTIBILITY

The Starcom unit will come with convertible packages, making it substantially less expensive to install a completely new game in your arcade. Therefore, you can build up a library of game packages to be used on your original units.

*DIMENSIONS

Upright:	Boxed:
72 1/2" height	77 1/2" height
25" width	37 1/2" width
30" depth	13" depth
130 lb. weight
